Abstract Text

This roundtable will start with a 15 min presentation (Bill Diesslin) presenting the facts (what we know) and fiction (what we have heard) regarding the pending DHS Chemical Facility Security Act. This presentation will help people with different levels of understanding have some clue as to what is going on.

The intro presentation will be followed by three short (~5 min) presentations on what each presenter is doing to prepare for the Top-Screen.

The session will end with a 15 minutes open forum, with additional discussion into the break for those who are interested.
